PROFESSIONAL SUMMARY

Computer Science and Engineering student at RIT (expected 2028) with academic project experience in web development, databases, and introductory machine-learning concepts. Familiar with Java, Python, SQL, and data structures and algorithms. Seeking an internship to learn from a development team and build practical software skills.

EDUCATION

Rajarambapu Institute of Technology (RIT), Maharashtra Expected 2028

B.Tech, Computer Science and Engineering | Minor: Mechatronics | CGPA: 7.98/10

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, JavaScript
Web & Databases: HTML, CSS, MySQL, relational database concepts
CS Foundations: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, debugging
AI & Data: Machine-learning fundamentals, decision trees, predictive modelling, data analysis
Tools & Practices: Git, GitHub, VS Code, Agile fundamentals

PROJECTS

PAYVORA: AI Risk Manager | React, Vite, Node.js, Express, Supabase, Razorpay

- Built a full-stack payment-risk prototype connecting a React frontend to Express REST APIs and Supabase.
- Integrated Razorpay Checkout with server-side payment handling, scoped to test mode (no real transactions).
- Designed risk workflows with explainable reason codes to make flagged payments easier to interpret.

Smart Campus Routing System *(Team Project)* | TypeScript, Node.js, Express, Graph Algorithms

- Contributed to graph-based campus route computation using shortest-path logic and Dijkstra's algorithm.
- Contributed to role-based access flows for Student, Faculty, and Admin users.

EventHub: Campus Event Registration System | React, Vite, Tailwind CSS, Express, MongoDB

- Built event creation, listing, search, department filtering, and registration workflows in a full-stack campus app.
- Connected the React frontend to the Express backend; implemented event publishing and registration feedback.

Vendor–Invoice–Inventory Analysis | Python, Machine Learning, Data Analysis

- Developed a machine-learning project on vendor, invoice, and inventory data to explore operational patterns.

LEADERSHIP & ACHIEVEMENTS

Secretary, NeuroCloud AI & Cloud Computing Club, RIT

- Coordinate AI and cloud technical activities and student engagement for the club.
- Maintain documentation for club sessions and events.

Smart India Hackathon 2025, Ministry of Power Track

- Team VOLTRIX reached the Top 7 Teams stage and was waitlisted, working on AI/ML-based predictive maintenance for EHV circuit breakers using DCRM analysis.

LANGUAGES & INTERESTS

Languages: Marathi, Hindi, English, German (A1)

Interests: Traveling, badminton
